

8 MONTHS ROADMAP TO ACE PLACEMENTS

In Your 3rd year?
You've still got a shot!

Subhesh Kumar
Co-Founder ▶ AlgoPrep

You are in your 3rd year and **have not prepared** well for Placements?

Don't worry, you still **have a good shot.**

Follow my **8 Months Roadmap** to ace Placements:

0 - 30 DAYS

- Learn Python (**it's easy to learn**)
- **Add Libraries** to your arsenal
- Solve **math problems** on HackerRank

Note: **Suggested Python** because learning C++/Java will take 3X time

31 - 120 DAYS

- Follow a **DSA Course**
- Submit **solutions on GFG** for problems in the Course
- Keep **raising the level** of problems
- **Identify Patterns** and read other's solutions

121-150 DAYS

- Solve **Problems on Leetcode** with high level of Difficulty Tag
- **Give Contests** and maintain a speed
- Solve **Unsolved Problems** after the Contest
- Develop a **habit of understanding** other's solutions

151-210 DAYS

- **Collaborate with others** on a project
- **Learn the skill** needed to do your part
- **Learn GitHub** and add projects there
- **Keep practicing DSA**, don't drop it

210-240 DAYS

- Learn **fundamentals subjects** like OS, DBMS
- Start practicing **Aptitude Problems**
- Solve **Problems while recording yourself**
- Improve **your explanation**

This was the whole
roadmap of 8 months

and if you **do it patiently**,
you will get the great offer

If you are in your **3rd year**
and still haven't started

Follow this roadmap and
don't waste a single day
now.

Just remember, you
may take a little
more or less time
than this roadmap

It doesn't matter at
all.

Explore things at your
own pace and keep
the focus on learning

You will do great in
your Placement
Drive

All the Best!
